## Experience

### 3click — [3click.ir](#)

Jul 2023 - Oct 2023

**Tour card redesign:** Optimizing the visual design and user experience of the tour card. The difficulty in doing this was to include a large amount of information in a card of suitable and eye-catching dimensions.

**Redesign of passenger information page:** Reviewing the design of this page based on the fields added by the product manager, as well as reviewing the location of the final costs box and invoice so that it does not leave the user's view. Changing the layout and components of the data entry form with a more optimized user flow.

**Redesign of the order information review page:** Redesigning this page with other order registration pages, based on the design of the existing system and optimizing the information layout.

- Figma
- Attention insight plugin
- User flow
- User journey
- Wireframing
- Prototyping
- Component base
- Auto layout

### SavvyTech — [savvytech.app](#)

Jul 2023 - Oct 2023

**Canam (Managing the transfer of rental products):** Designing a complex user flow to manage the transportation of a rental product was one of the complexities of designing this user flow, the implementation of product receipt confirmation, product departure from the warehouse, and receiving warnings and notifications by the parties, which had to be accompanied by minimal forms and pages. User flow design to manage the delivery of the rented product.

**A Price Comparison Website:** Website design including user journey design, wireframe, and base component design in Figma. A website that compares the price of a particular product or service in different stores or from different companies.

**Redesigning and designing new features in Bevvex, Notitia, and Savvyshop projects.**

## Projects
